COOPENERGY: Final Project Newsletter!

Welcome to the **sixth and final** edition of the COOPENERGY project newsletter.

A farewell from the Partnership...

Over the past three years, we have been implementing mechanisms for collaborating better on our energy initiatives (multi-level governance mechanisms) across the seven sustainable energy regions involved in the project. We have really enjoyed working together, sharing the pitfalls and successes of our techniques and achieving some ambitious energy projects and strategies along the way. To all our readers, we wish you the best of luck with your sustainable energy projects and hope some of the tools and guidance we have developed (below) can help you to create a truly collaborative approach to delivering sustainable energy projects and plans.

Best wishes

The Coopenergy Partnership

In this edition we will be highlighting our final project tools and some of the other projects which may assist you with your energy planning:

- [NEW Guide on collaborative approaches to sustainable energy!](#)
- [More resources from the Coopenergy project](#)
- [Further support and guidance from IEE projects](#)

If you would like to share news on your sustainable energy projects and partnership work, please contact us at climate.change@kent.gov.uk

New Guide for sustainable energy

Through the Coopenergy project we have been testing different methodologies for collaborating well on energy initiatives in partnership. As a result we have now published a guide with some of the best methods of partnership working that we tested (Multi-Level Governance mechanisms).

The Guide includes:

- A step-by-step methodology on how local authorities and regional authorities can collaborate together on their energy work.
- Hint and tips on setting up a collaborative energy process.
- Good practice case studies of energy initiatives from across Europe, from a database of over 60 available on our website: <http://www.coopenergy.eu/good-practice-resources>.
- Links to further resources and guidance.

Read the Guide online, or download a PDF of the Guide, on the Coopenergy website: <http://www.coopenergy.eu/mlg>

More resources from the Coopenergy project

- **Videos** – all project partners have produced videos to summarise their efforts to develop collaborative regional energy plans through the project, in partnership between the Local and Regional Public Authorities. **Watch each video on our website:** bit.ly/1Xdc3Xc
- **Energy evaluations** – Ranging from public lighting to community energy schemes, project partners have evaluated the energy projects they have been collaboratively delivering in their local regions. **Read the reviews of each joint action on our website:** bit.ly/Coopdocs

Watch our video for more tools available to assist you with your energy projects:

Further support and guidance from IEE projects

Through Coopenergy we are aiming to test and share the best models of 'cooperation' between regional and local public authorities. Alongside our work, there are many other Intelligent Energy Europe-funded projects which could support your sustainable energy initiatives.

To find out the best projects to help your work, use our flow chart below:

Which IEE Project do I need?
